

Therapeutica® Pillows

Ergonomically Designed. *Therapeutically Sound.*

Ergonomically designed to maintain spinal alignment during sleep

Cervical Contour

- Maintains natural lordosis of the cervical vertebrae during back sleeping

Centre Cavity

- Cradles head for optimal head support
- Enhances patient comfort
- Stabilizes neck area (whiplash)

Brachial Curvature

- Curved top edge maintains shoulder clearance
- Sloped panel minimizes compression

Contoured Head Rest

- Maintains spinal alignment during side sleeping

Flexible Side Panel

- Lateral cavity allows for pressure free side sleeping

Wedge

- Supports thoracic vertebrae
- Maintains ergonomic bridge between thoracic and cervical regions of spine

Elevated Side Profile

- Considers individual shoulder depth to maintain proper spinal alignment during side sleeping

Back Sleeping

Side Sleeping
